

# Earthquake Prediction

EDITED BY S. MUKHERJEE

- Expected May 2006
- ISBN 90 6764 450 1
- Paperback (xii+92 pp.)
- List price EUR 98.- / US\$132.-

Earthquake Prediction is the ultimate goal for geoscientists. This volume presents the latest ideas of the ever fascinating and challenging research of earthquake prediction. Sunspot activity and Coronal mass ejection are considered to be influential phenomena in affecting both the electric as well as the magnetic characteristics of sun-earth environment. All these changes have been observed before the occurrence of earthquakes and tsunami in various parts of the earth.

A session on Earthquake Prediction, chaired by Dr. Saumitra Mukherjee was held during the European Geosciences Union General Assembly 2005, (Vienna, Austria, April 2005). The EGU General Assembly was able to bring together 8000 geoscientists from all over Europe and the rest

of the world into one meeting covering all disciplines of the Earth and Planetary Sciences. This book presents the 7 papers presented in the session on Earthquake Prediction.

**Readership:** All those interested in Geology, Geophysics, Earthquake and Civil Engineering and Geological surveys including Sun-Earth connection study group of NASA/ESA and other space science organisations.

Saumitra Mukherjee, Ph.D. (1989) in Geology, BHU, India. He is an Associate Professor at the Jawaharlal Nehru University, India and Visiting Professor at the University of Liverpool, UK, collaborating with ESA & NASA. He has published extensively on Remote Sensing applications, including the Text book of Environmental Remote Sensing (Macmillan 2004)
